Projects

Responsive Portfolio Website

Tech Stack: HTML, CSS, JavaScript, Node.js, Express, MongoDB
• Designed and developed a personal portfolio website with dark/light mode, dropdown menus, and scroll-based section highlighting.
• Implemented secure login/signup functionality using JWT and MongoDB.

AI Chatbot Web App

Tech Stack: HTML, CSS, JavaScript, Node.js, MongoDB, Gemini API
• Built a fully functional AI chatbot web application with user authentication.
• Integrated Gemini API to provide real-time responses in a user-friendly interface.

Chat App using WebSocket & Ngrok

Tech Stack: Node.js, WebSocket, Express, HTML, CSS
• Built a real-time chat application allowing multiple users to communicate simultaneously.
• Used WebSocket for bi-directional communication between client and server.
• Hosted the app locally and exposed it via Ngrok for public access.
